

## Safety Management according to EASA Part 21

### 6.1.1 Our safety policy:

Safety takes centre stage at all times. As the HoD in charge, it is my duty and responsibility to ensure the safety of all our activities and services.

We will ensure that adequate resources and training are provided for effective safety management. We encourage all our employees and stakeholders to report safety incidents or potential hazards, no matter how insignificant they may seem at the time.

We promote a “just culture” that protects and treats people fairly when they openly report safety, quality, and compliance concerns.

Safety is not the sole responsibility of any single person or department, it involves all employees in the company, and it is the responsibility of all of us to comply with this policy and to strive to improve our safety standards at every opportunity. The principles of the human factor are always taken into account when implementing safety policy.

We ensure all employees understand that we all have a daily obligation to pursue safety, quality and compliance as described in this safety policy.

The security policy is reviewed annually and adjusted if necessary.

Beverungen, 15.03.2025

.....  
Dr. Theo Mennekes  
Head of Design Organisation (HoD)

## Security-related incidents and special occurrences

Interested parties (e.g. customers, operators) can report these to us in the text field below.
